

Beta Group Newsletter

Welcome to the Beta Group Newsletter. This will be sent out as new updates occur, such as bug fixes, feature rollouts and new training material releases. Back issues will be saved in the ARCUS Knowledge Base site.

A post was made today with a list of the changes that were made overnight. There were several bugs that were addressed and a few pieces of new functionality added. [Read It Here.](#)

Navigating Pages on the Grids

Changing the number of records shown on a grid and navigating through several pages can sometimes be laborious. Here are a few tips to help with this.

Filtering & Sorting Columns

Data in the columns will often need to be organized in different configurations. This data can be ordered or filtered. A short video has been created to show how to use the sorting and filtering functions in ARCUS.
