FTL Edit Order Shortcut

Users can now enter the Edit Order screen quickly from the Load Grid on FTL loads. There is now a new option in the drop down menu that allows for this function ('Edit Order').

LTL loads will maintain the original way of the 'View Orders' button taking them to the Order Grid with the associated orders listed.

New Option for Returning to Load Grid on Save

Users now have an option for what happens when they Save an Order or Load from the Edit screen. In the original 'Default' way, you would be returned to the same screen that you were on when you entered into the Edit screen. The new 'Optional' way allows for you to automatically return to the Load Grid when you save your edits.
