

Temperature Changes

- A. For FTL Loads (one manifest), the Carrier Instructions Temperature on the Load will be set by the Temperature on the Order. It will be read-only on the Load Maintenance Screen.
- B. For LTL Loads (multi-manifest), the Carrier Instructions Temperature can be set independently of the Orders on the Load. However, a new warning will appear on the Carrier Confirmation screen if there is a difference in temperature from the Order to Load.

New Stop Sort Method

TEMPERATURE

An additional stop sort method has been added for Loads that have a large number of stops. The new "Sort Stops" window will allow you to drag-reorder your stops.

	CONCEL 4 INCOLOND III SELECTION
Load information	Carrier Information
Assigned To None	Carrier Brokerage % Tractor Number Tractor Number
Select Dispatcher	Carrier Contact Carrier Contact Driver(s)
\$ 0:30.00	ED RATES A CARRIER LAVE SEARC
	torthin torthin torthin torthing ↓ torthing 10000131mm 1032mm

It should create a smoother experience for loads with large amounts of stops.

Branch Location Favorites

Branch Location Favorites have been added. You can add a Favorite by clicking on the Branch Location Info Button and then clicking on the Star Icon on the upper right corner.

Stop Location Information		<u> </u>
INFORMATION		
	1.44	

You will then be able to choose from your Favorites List by clicking on the Star Icon next to the Branch Location.

AND A DECK				t Type		- Ange
NEW			Length	Height Width	Load Looks	Quantity 0
					Straps	Quantity 0
🖗 0 Stops † 0 Picks (0 Items) 🛓 0 1	Drops (Ditems)					
			Stop Date *	 Step Location * 		Pickup/Delver
		<u> </u>				

What are we working on:

- EDI Functionality
- Fuel Cards
- Favorites List for Carriers and Customers

Helpful Tip: Closing your browser window each night will help ARCUS run more smoothly each day by ensuring the newest version is always loaded.
